

In 2013 I was told I needed back surgery. I did not consider this an option. Fortunately for me I read Dr. MacFarland-Bryant's article in the Chronicle, "Spinal Decompression" treats disc injuries. I made an appointment to discuss this treatment with her & decided this was the way to go. My experience with her has been most rewarding. I am pain free & can continue with my pain free life. Dr. MacFarland just might be your answer to better & improved health. Go Chiropractic before accepting the surgical route.
